

1 2 beam splitter fc

Overview

This fiber-coupled Beam Splitter 1 → 2 is a compact opto-mechanical unit that splits a fiber-coupled source into 2 output fiber cables with a fixed splitting ratio and a high efficiency. The input port is fiber-coupled to a PM fiber cable. Requests for custom fiber pigtailed, different wave 37362 zed light in, through slow axis, Port 2: 50%, through slow axis, Port 1: 100%, Linear polarized light out. Newport's F-PBC Series Polarization Beam Combiner/Splitters can be used to combine light from two PM input fibers into a single SMF-28 output fiber, or to separate the orthogonal polarization components of an input signal between two output fibers. Employing Agiltron's advanced micro-optic design, it features low insertion loss, epoxy-path, high extinction. Above specifications are for device without connector. For devices with connector, IL will be 0. com 127 Business Park Drive, Frankfort, New York 13340.
