

35kV tower fiber optic cable laying

Overview

This document provides procedures for installing OPGW fiber optic cables on transmission lines between 35kV and 400kV. It outlines the planning, installation, splicing and testing processes. Special care must be taken to avoid damaging the optical fibers during installation by observing minimum. Installation works shall be accomplished according to the general guidelines for fibre-optic cable and connectors. Always handle the equipment with the adequate care. Understanding Overhead Fiber Optic Cable Overhead fiber optic. The objective of this document is to be an optical fibre cable installation and laying guide, addressed to new installers, also being useful as a reminder to experienced installers. In extreme cold climates, cables may need to be buried at greater depths where there temperatures are colder and frost penetrates to.
