

Are fireproof cable trays rust-proof

Overview

Stainless Steel: Highly resistant to corrosion, ideal for harsh environments. Different applications require tailored. Protecting cable trays from corrosion ensures they remain functional and safe over time. **Rust Removal:** Use sandblasting, acid washing, or grinding to eliminate rust. The surface must reveal a clean metallic shine. This white paper compares the High Resistance (HR) and Hot-Dip Galvanising (HDG) solutions and highlights the new High Resistance range, ZnAl. Before installation, ensure these plates are treated to remove rust, coated with anti-rust paint, and finished with a fireproof coating. · **Building Water Stop Platforms:** In vertical shafts, ensure that reserved openings are constructed with a smooth and aesthetically pleasing water stop platform. Our tested solutions for cable fire protection can delay the spread of fire in order to minimise the damage sustained.
