

Audio wiring in integrated distribution cabinet

Overview

Wire a Cat 5e/Cat 6 cable from each output port of the Audio Distribution Module to a Volume Control Module (165 feet max). Terminate each end of the Cat 5e/Cat 6 with an RJ 45 connector (CC-CT0500), following the T568A pin configuration. See the chart above on the pin. This paper shall cover the basics of pre-wiring a distributed audio entertainment system. Such a system shall deliver high-quality, stereo audio to various rooms or areas (also known as zones) throughout the residence. Distributed audio (sometimes referred to as whole-house or multi-room audio). A sound system wiring diagram can be a valuable tool to help you understand how all the components are connected and how they work together to produce high-quality audio. Please read all instructions before operating the equipment and save this manual for future reference. This diagram serves as a guide for technicians and enthusiasts when setting up or.
