

Black leakage from the distribution box

Overview

The leak or overflow in your d-box may be because of the drain field's groundwater saturation, backing up of the water out into the d-box lid, and drain field flooding. When drainage blockage causes the d-box to overflow, simply sealing its lid or cover is not enough. One of the most common issues with distribution boxes is clogging. This can lead to uneven distribution of effluent, causing some drain lines to become overloaded while others remain dry. When this critical component becomes blocked, wastewater may back up into the home, flood the drainfield, or contaminate surrounding soil and. Diagnose problems at the septic system drop box: procedures for troubleshooting leaks, smells, or backups & flooding in the septic system D-box.
