

Cable tray concealed conduit for fiber optic cable installation

Overview

Optical cable tray is a system designed to protect and route fiber optic patch cords, cable assemblies to and from network cabinets, ODF and other terminal devices. Ducting offers ideal solutions for optical raceway requirements and application with pleasing appearance and easy. According to the 2014 National Electric Code® (NEC), any listed optical fiber cable is acceptable for a tray application. It also facilitates cable management and ease of maintenance. It allows for quick intervention on the network, minimizing downtime. In addition, the system is flexible and easy to evolve! Legrand Data Center Solutions' fiber raceway cable ducting range is the preferred choice for many. Our Fiber Cable Tray System is a comprehensive raceway solution for data center, enterprise, central office, and mobile switching center applications.
