

# Can fiber optic cables be used for router branch connections

## Overview

Q: Can I plug a fiber optic cable directly into a router?

A: Only if your router has an SFP port designed for fiber. Q: Do I need a special router for fiber optic internet?

A: While not all routers support fiber, many modern models do. We provide bulk fiber patch cords, ONTs, and pre-terminated cables for large-scale FTTH deployments. [Get a Project Quote] Are you ready to unlock the blazing-fast potential of fiber optic internet?

The process to connect fiber optic cable to router requires careful attention to detail, but I'll. To connect your fiber optic cable to a router, ensure you have the following:  
Fiber optic modem (ONT): Most fiber connections require an Optical Network Terminal (ONT), provided by your ISP. These can behave like a typical Ethernet switch. A small box on the outside of your home called a NID is installed and the fiber is coiled in there and connected to a fiber that runs into the home. There are several types of connectors, including LC, SC, and ST.
