

Can fiber optic networks be used without a router

Overview

While fiber internet doesn't require a modem, you still need a router to distribute the connection across your network. Traditional internet services rely on copper cables that transmit electrical signals. Your ONT handles signal conversion, eliminating the need for a traditional modem altogether. Related Article: [Fiber-Optic Network vs Cable Internet, How to Choose?](#)

What is an Optical Network Terminal (ONT)?

An ONT (Optical Network Terminal) is a device that. The answer is actually no—fiber optic equipment differs significantly from cable setups. Additionally, you'll need a compatible. This article will give you an overview of the use cases for fiber-optic networking, some of the terms used in fiber networking, and suggestions for setting up a fiber network. Once you understand the basic concepts, you can check out my Recommended Equipment section toward the bottom of the. With fiber optics, you can experience download and upload speeds that can reach up to 1 Gbps (gigabit per second) or higher, making it ideal for activities such as streaming 4K videos, online gaming, and running smart home devices.
