

Canada Promotes Energy Internet

Overview

84% of Canadians support federal funding for an Inuit-owned project known as the Kivalliq Hydro-Fibre Link, which would bring hydroelectric power and high-speed internet service to Northern communities. Traditional energy exporters like the United Arab Emirates and Saudi Arabia are also diversifying, investing heavily in clean electricity. Access to abundant, affordable, and reliable electricity is – more than ever – fundamental to competitiveness, energy security, and economic sovereignty. It. Support CleanTechnica's work through a Substack subscription or on Stripe. In spark*insights research, conducted on behalf of Nukik Corporation, we gave respondents a. Canada's Clean Electricity Strategy is a comprehensive plan to generate most of the country's power from clean sources by 2035. The development of this strategy will ensure. This publication is a part of IISD's Clean Energy Insights policy brief series, which outlines the benefits of a net-zero economy for Canadians across the country.
