

Classification Standards for the Uses of Colored Pigtail Fiber

Overview

This guide explains the latest EIA/TIA-598-D fiber color-coding standard used to identify fiber types, inner fiber sequences, and connector polish styles. With clear tables and updated details, it serves as a comprehensive reference for technicians handling modern fiber optic. WolonFiber's 12-Color Fiber Optic Pigtail Packs are manufactured strictly to the TIA-598-C standard with vibrant, easy-to-identify colors. Perfect for fast, error-free termination in your ODF or splice closures. Available in OS2/OM3/OM4 at factory-direct wholesale pricing. Fiber Optic Color Code Explained Written by Ben Hamlitsch, trueCABLE Technical and Product Innovation Manager RCDD, FOI We are surrounded by colors. Colors are even used in. Fiber Optic Pigtails are mainly categorized into single-core, dual-core, 4-core bundled pigtails, 12-core bundled Fiber Optic Pigtails, 12-color bundled pigtails, SC bundled Fiber Optic Pigtails, FC bundled pigtails, LC bundled pigtails, and ST bundled pigtails. Fiber optic pigtails are used to terminated fiber optic cables via fusion splicing or mechanical splicing as shown in the picture. The color sequence (aka color code) is specified by EN 50174-1, ISO/IEC 14763-2, IEC TR 63194 and ANSI/TIA-598 to name a few.
