

Configuration of 30kW distribution box

Overview

The 30 kW AMEPDIS unit is a 120/208VAC, 60 Hz, 3-phase system that accepts multiple AC electrical inputs from larger power distribution units (PDUs), as well as single or paralleled power generation sources. metering, monitoring, and distribution. The individual system sub-racks can be factory integrated into a standard IT rack or provided separately for cust rent during normal operating conditions. Designed for the USMC, it to work as part of a larger electrical grid. The pictures displayed for this unit are a general representation of form factor and may not *All grounding shall comply with state and local codes and meet the minimum requirements of the National Electronic. The 30 KW PDP is designed to accept power at 120/208 VAC, 3-phase, utilizing a 100 amp Class-L connector. Electrical power distribution consists. requirements for the size of the unit to which they are deployed. R provides superior impact, weather, provides superior impact, weather, provides superior impact, weather, provides superior impact, weather. Voltage: AC 380V \pm 15%, 50Hz frequency. Equipped with protection features including over-voltage, surge, short circuit, over-c.
