

Dimensions of Power Distribution Box 21

Overview

The Merlin Gerin Complete Set of Power Cabinet Distribution XL-21 Series (XL-21/2000×800×400) is an advanced, high-performance solution for distributing electrical power in large-scale industrial, commercial, and residential installations. XL-21 power distribution cabinet Cabinet front door installed ammeter, voltmeter and the signal lamp, button, selector switch and other components. The main distribution box adopts self-design of new components, compact structure, beautiful appearance, easy maintenance, a variety of wiring options. Standard Type (P Type): This version has a cabinet height of 1700mm or 1800mm and is designed for independent installation. It serves as the central hub for receiving and distributing electrical energy in low-voltage systems up to 380V. We'll explore its key features, installation requirements, safety standards, and maintenance. XL-21 floor-type low voltage power distribution switchgear Production description The XL low-voltage distribution box is suitable for power users such as power plants, substations, industrial and mining enterprises, and highway tunnels. As a power supply system with AC 50Hz-60Hz, rated working.
