

# Distribution Box Wire Color Codes

## Overview

The mandatory colors for power wiring in the National Electrical Code (NEC) are Green, Bare, or Green/Yellow (a yellow stripe or band on green) for the protective ground (PG), and White (or alternatively Gray) for the neutral wire. Note: Large conductors tend to come in only black and are labeled with colored tape at each end. Since the standards. Most European countries follow a wire color code established by the International Electro-technical Commission (IEC). This article is for reference only. With clear color differences, it ensures safety, efficiency, and accuracy in electrical installation, maintenance, and repair. However, any other colors, except those mentioned above, can be. Figure 1: Wiring color codes for AC supply in UK/EU Like the AC system, the UK/EU follows standard wiring color codes for two-wire grounded, ungrounded, and three-wire grounded DC systems. Figure 2: Wiring color codes for DC supply in UK/EU. The IEC 60446 standard, "Basic and Safety Principles for Man-Machine Interface, Marking, and Identification," establishes global guidelines for identifying electrical equipment terminals, conductors, and wiring colors.
