

Do residents have their own electrical distribution boxes

Overview

Most residential and commercial electrical systems have at least one distribution box. A distribution box is a device that, as the name suggests, is designed to distribute electrical power. It receives power from the main electrical supply and divides it into separate circuits, each. Bottom Line Up Front: Your home's distribution box (electrical panel) is typically located in the basement, garage, utility room, or mounted outside near your electrical meter. To find it quickly, look for a rectangular gray metal box about the size of a medicine cabinet, often positioned close to. There are over twenty million domestic dwellings in the UK and each has an electrical installation, usually with electricity meter and consumer unit arrangement supplying the lighting and power in the dwelling.
