

Does the aggregation switch have an optical module

Overview

The PEN passive aggregation module, also known as passive optical splitter or passive multiplexer, splits and multiplexes optical signals. An 8-port, Layer 2 switch made for 10G SFP+ connections. Downlink direction: The PEN passive aggregation module splits the light from the uplink port proportionally based on the energy and does not operate the. Equipped with eight SFP+ ports, two additional SFP28 ports and one RJ45 console port for configuration. Take advantage of a wide range of pluggable transceiver modules. Get built-in stack and power resiliency. Gain extensive application visibility on all switch ports using Cisco IOS® Flexible NetFlow. By bundling multiple network connections into a single high-bandwidth link, aggregation switches help.
