

Exfo optical power meter error adjustment

Overview

This application note demystifies how EXFO's IQS-12002 Optical Calibration System can guide you through the calibration of power meters, covering issues such as traceability and technical characteristics of detectors, while explaining the procedure in detail. Conventions Before using the product described in this guide, you should understand the following. Be used as a standard optical power meter (OPM operation mode). Port 1: 1310 nm (ONT) Port 2: 1490 nm (OLT)/1550 nm (video) Pass-through device (spy mode): does not block communication between ONT and OLT. Allows triple-play testing (voice, video and data). -101 SCPI-Based Errors96 PM-1100-300 "Invalid state." The state of the PM-1100 is not compatible with the command sent. Find the answers you're looking for. By doing so you will now be able to stay up to date with. An essential device in today's field toolkit which combines seamless reporting capabilities and ease of use in a pocket-sized form factor.
