

Fiber Distribution Box Positioning Marker

Overview

Fibre-optic handover system Distributor housing Removable pylon marker for identification during the construction phase. For download of data sheet and tender specification please configurate. ication and relevant standards over the range of optical wavelengths from 1260nm to 1625nm. Marker Ball Marker Balls are ideal for marking fiber cable in high-voltage environments. Why do operators, designers, and installers use additional fiber optic hardware racks for cable and fiber management?

The active electronics are the most expensive part of the. The introduction of the Ball Marker, based on low-frequency RFID technology, effectively solves these issues. This passive product remains dormant when not in use and is activated by external devices when needed.
