

# Fiber Optic Cable Defense

## Overview

Fibre optic solutions are proven to have the reliability and robustness required in defense avionics systems. Higher bandwidth optical fibers in robust, space-saving constructions for next-gen systems, transmitting instant data and video at maximum capacity. Yet, these cables are no longer just for communication—they now play active roles in detection, early warning, energy direction, and thermal stealth. This transformation is. If you design, build or supply Fiber Optic Cable Solutions, create a profile to showcase your capabilities and connect with visitors who have an active requirement for your solutions. Military forces around the world require secure, high-speed, and highly reliable communication technologies to maintain operational.
