

# Fiber optic cable drilling service price

## Overview

Market talk (contractor pricing): Many trenchless contractors publicly quote ~\$15-\$50 per foot for straightforward fiber bores, with outliers from \$10 up to \$100 per foot depending on conditions and scope. Benchmarks from industry research (deployment cost basis, not contractor sell price): The. Fiber optic cables consist of multiple fibers, each designed for high-speed data transmission. These fibers are thin strands, often as small as a human hair, that transmit data as pulses of light. With prices ranging from \$1 to over \$ 50 per linear foot, depending on the installation method. Solid rock around here is about \$50-70/ft typically for the boring consumables and labor then add duct, cable, termination, etc. for total project price of course. I'm not in a particularly rocky area, and it's virtually flat, so there are rarely access issues and setup/teardown of the rig is. Home and business fiber optics projects typically range from a few hundred to several thousand dollars, depending on run length, fiber type, and labor needs. This. We have drilled FTTP Projects, also called Fiber to the Home (FTTH) which is a pure fiber-optic cable connection that runs from the Internet Service Provider (ISP) directly to the user's home or business. Conduit systems add \$2-4 per foot but allow future cable additions.
