

Fiber optic splitter patch cord damaged

Overview

This article outlines five specific steps for repair: 1) Identify the break; 2) Cut out the damaged section; 3) Strip the cable; 4) Trim the fiber ends; 5) Test the repair. DIY fiber optic cable repair kits are increasingly popular for those who prefer home repairs. Unlike backbone cables, patch cords are frequently connected, disconnected, bent, and handled by technicians, making them the most vulnerable. While a cut or damaged fiber optic cable can temporarily take your network down, it is possible to quickly fix the cable with the right tools. This wikiHow article will teach you how to splice a cut fiber optic cable back together with a fiber optic stripper and cutter and a fiber optic crimper. If you accidentally break a fiber optic patch cord in your server room or in any of your switch gear, now you can repair it on the spot and get back up and running in minutes. 2 dB/km), but it's fragile—susceptible to breaks, bends, and contamination. Repairs focus on restoring the light path with minimal signal loss (<0 . The device sends a light pulse down the cable and detects the point of reflection indicative of a break. Employ a fiber optic stripper.
