

Fiber to Switch Decoder Patch Cord

Overview

Fibre optic patchcords are single-, dual-, or multifibre data cables that are factory-assembled with the commonly used fibre optic connectors – LC, SC, E-2000, MTP, SN, CS, MDC, etc. – and are used to connect IT hardware (e.g. These connectors enable quick connections of fiber optic patch cords to optical switches, telecommunications networks. Fiber Patch Cords or Jumpers or Jumper Cords are used to connect Fiber Panel Port to the respective Switch Port. 10Gbps throughput and may go upto 200 or 400Gbps based on respective design for Singlemode or Multimode Fiber. At ZION Communication, we design and manufacture a full range of fiber patch cords for: This guide will help you quickly understand the main types of fiber patch cords and how to choose the right solution for your project – and how ZION can support you with stable quality, flexible customization. Fiber optic patch cables are indispensable components of modern fiber optic systems. In combination with the appropriate splicing technology, our high-quality fiber optic patch cables ensure reliable and high-performance fiber optic cabling.
