

Fire-supporting optical cable

Overview

Fire-Resistant Optical Cables are specially designed to maintain data transmission integrity even in the event of a fire. Constructed with materials that resist combustion and prevent the spread of flames, these cables ensure uninterrupted communication and network functionality. ETK Kablo 's fire-resistant fiber optic cables ensure continuous data transmission during fire conditions, safeguarding critical communication lines when reliability is most crucial. Certified to B2ca CPR and FE180 fire-resistance standards, these cables maintain optical integrity under extreme. Optical cables for broadcasting and HD TV Cameras Optical cables for sensing and monitoring temperature, vibration or intrusion. In Optral we manufacture cables with the best optical fibers in the market. The outer sheath is made from black UV-stabilised and. FireTuf fibre optic cables are manufactured by Prysmian Draka. Offered in OM1, OM3 and OM4 multimode and OS2 singlemode, in 4, 8, 12 or 24 core fibre configurations.
