

GPON user terminal device AN5506-01-A

Overview

The AN5506-01-A is a GPON bridging-type ONT. It uses the GPON technology to realize ultra-broadband access, and ensures the user experience of voice, data and HD video services. The equipment is small and easy to deploy. Figure 1-1 Network diagram of the AN5506-01-A As shown in Figure 1-1, the AN5506-01-A is used together with the AN5516-01 (OLT). They together make up a GPON system that provides a large-capacity, high-reliability multi-service access network. It provides users with communication and entertainment services in the form of data, voice, video, and so on, to meet the integrated access demand of families and small-scaled enterprises. Single Ethernet Port: Typically equipped with a single Gigabit Ethernet (GE) port. Table 2.
