

Grid-like cable trays

Overview

Grid Cable Trays are metal structures designed to support and organize cables. Made from steel or aluminum, they allow proper airflow and easy access for maintenance. Panduit offers industry-leading Cable Routing Systems as part of comprehensive, integrated Data Center Solutions to effectively manage and protect high-performance communication, computing, and power cables. These trays offer a highly flexible, reliable, and cost-effective solution for cable management, whether in . , is a welded wire-mesh cable management system made of high-strength steel wire. It is used to manage cables for light B manufactures its cable tray in a range of materials with a variety of finishes. The selection of material and finish is a function of the environment in wh tant in a wide range. The Wire Mesh Tray is an excellent choice if you are considering exposed electrical installations, where the wiring can be seen at a glance, allowing you to create a modern and industrial design in any setup. Additionally, it helps prevent cables from overheating thanks to the wire mesh tray. A. The LANZ mesh trays and flat grids are made of robust steel, with rounded shapes and with halogen-free polyethylene coating in accordance with IEC 60754-1 / EN 50267-2-1 standards (RAL 7035), or stainless steel. They are available in widths of 100, 200, 300, 400, 500 and 600mm. We meet the high safety requirements for functional integrity in the event of an E90 fire, earthquake SIA 261 or vandalism through continuous, strict controls.
