

# High-precision MPO connector for relay protection

## Overview

The MPO connector offers up to 12 times the density of standard connectors, providing significant space and cost savings. The MPO-PLUS® connector is the pinnacle of multi-fiber development, representing the most precise, feature-rich MPO connector on the market. SENKO is leading the way in low-loss MPO ferrules that exceed the standard and deliver the maximum amount of network agility and link performance to deliver. At the heart of the connector is the most advanced Fujikura MT ferrule, providing ultimate precision and environmental °exibility for your high-speed, high-performance network. Its innovative push-pull boot design eliminates the need for tabs, allowing quick and secure connections. It supports up to 12 fibers in a compact form factor and provides improved performance and reliability compared to traditional single-fiber connectors.
