

# How far is the distribution box from the electricity meter

## Overview

The distance between the meter box and the electric panel box can vary based on local codes and regulations, but a common requirement is typically within 10 to 25 feet. However, a main service disconnect is typically required to be within 6 feet of the meter, depending on local ordinances. I plan to run the connection wiring in PVC conduit on side of the. Is there a max distance from meter box to consumer unit?

Im building a new house, and how the side is set out is a little complicated in terms of side door, soil pipe from 2 bathrooms above and utility next to kitchen. So im trying to make sure i dont make a mistake when fitting the elctricity. Understanding the electricity supply to my house (pole, underground cable, meter box, etc. ) Hi all, I am currently wiring a new build electrical dwelling consisting of standard domestic circuits ie. up/down ring mains up/down lighting etc.
