

# How much does a 1-kilometer 12-core optical cable weigh

## Overview

They can weigh between 60 to 200 kg per kilometer (39.7 to 132 pounds per 1000 feet), depending on the design and materials used. Imm (main cord) Material Stainless Steel Color Silvery White UL94 V-0 (\*Burning stops within 10 seconds on a vertical specimen, no drips of flaming particles. ) \*Exact product code is subject to the cable length. Specifications are correct at time of printing and subject to change or alteration. Calculate cable weight from length and weight per meter, or estimate total weight by cable size, material, core count, and insulation. Outdoor Fiber Optic Cables: These are usually heavier due to additional protective layers. D compliant low water peak grade and offers OS2 performance and OS1 backwards compatibility. The outer sheath is made from black UV-stabilized and weather resistant material which is SHF1 classified, and may be exposed for shorter periods to fluids such as diesel and mineral oils.
