

# How much does a network rack cable cost

## Overview

Professional network cabling in 2026 typically costs \$150-\$250 per commercial Cat6 drop, \$200-\$350+ per harder Cat6A commercial drop, and \$200-\$400 for isolated finished-wall additions where minimum service-call labor dominates. Open-wall pre-wire lowers the per-drop cost. The cost of installing one or two cables can range anywhere between \$300 to \$850, for larger projects you can expect anywhere between \$1,200 to \$60,000+. Like most trades, the cost to run an ethernet cable or the cost of structured cabling will depend on many factors. Finished-wall retrofits. Network installation costs vary significantly, ranging from \$2,500 to \$6,000 or more, as there's no one-size-fits-all network cable installation pricing model. £99 minimum spend applies. Requires a running Currys flexpay credit account. Promotional interest rates may be offered on selected products from time to time.
