

How to connect a 100Mbps fiber-to-electrical port module

Overview

Locate the SFP port on your network device. If you are using a media converter, insert the SFP module into the. Fiber transmission, otherwise known as 1000BASE-X or 100BASE-FX depending on speed, is a type of communication interface that connects between two Ethernet PHYs. While Gigabit and higher-speed optics dominate modern data centers, many control systems, surveillance networks, transportation infrastructure, and. The 100FX SFP module for fast Ethernet (FE) ports provides a 100-Mbps optical link using LC connectors and 1310-nm MMF (multimode fiber) cable. The maximum transmission distance for this connection is 2 km. This plug-and-play unit provides reliable Ethernet-to-fiber conversion and supports interchangeable Comnet SFP modules (sold separately). Discover related ComNet products that work. how to connect fiber cable to switchhow to connect fiber module to switch how to use sfp ports on switchtimestamp0:05 – Product 10:10 – Product 20:20 – Tip. These transceiver modules are hot-swappable input/output (I/O) devices that plug into 100BASE, 1000BASE and 10GBASE ports (for SFP+), which connect the module port with the fiber-optic or copper network.
