

How to connect a vertical to horizontal mesh cable tray

Overview

The answer: use the right connection accessories for a secure, aligned and continuous cable support system. In most cases, sections of wire mesh baskets or electrical cable trays are joined using couplers, bolts, or proprietary connector kits. Systems support and route all types of cables. Depending on the type and version of mesh cable tray, as well as the corrosion protection used, the mesh cable tray systems can be ambient temperatures of - 20 °C to + 120 °C. These ensure the sections remain structurally sound. Instructions include the necessary cuts, splices, and connectors for the following assemblies: Hubbell's NEXTFRAME® Ladder Tray is the effective and widely used cable runway that supports and delivers bundles of cable between cabinets, racks, and closets, along walls, and suspended from ceilings. The Ladder Tray features light, rugged, tubular steel construction.
