

How to properly route fiber optic cables in a cable tray

Overview

Take care to properly route cables through cabinets and right angle raceways. Protect cables from excessive or frequent. The purpose of this AE Note is to outline the use of fiber optic cables in “tray rated” environments. During installation, all curvatures should be smooth. You should pull on the fiber cable strength members only! Never exceed the maximum pulling load rating. The information contained in this manual should serve as a guide to proper. This document discusses the Panduit recommended Best Practices for handling, installing, routing and securing Panduit MTP* Interconnect Cable Assemblies as they transition from either overhead pathways (Panduit FiberRunner™) or under floor pathways (Panduit FiberRunner™ or similar) to either.
