

How to strip the cables from a fiber optic terminal box

Overview

In this informative guide, we'll walk you through the step-by-step process of stripping and preparing fibre optic cable for termination, covering techniques, tools, and best practices to help you achieve successful terminations in your fibre optic installations. Properly stripping the cable and preparing the fibre ends ensures a clean and secure connection, leading to optimal signal transmission and network performance. In this instructional video, Bob Licari, Test Equipment Product Manager, demonstrates a simple way to strip optical fiber. more Audio tracks for some languages were automatically generated. What happens if you damage the fiber during this production step?

A tiny scratch or nick in the optical fiber is like a time bomb. Check for any cuts or. In this lesson, we will identify and examine cables, then prepare them for splicing or termination by stripping the cable to expose the coated fibers. It functions as a junction between the incoming fiber cable and the outgoing customer-side fiber cable, where one fiber can be spliced, patched.
