

Huawei Layer 3 Fiber Optic Switch

Overview

Based on Huawei's Versatile Routing Platform (VRP), CloudEngine S5736-S supports enhanced Layer 3 features, simplified Operations and Maintenance (O&M), flexible Ethernet networking, and mature Internet Protocol version 6 (IPv6) features. Huawei's comprehensive portfolio of products and solutions enables you to realize smooth digital transformation and rapid growth of virtualization, Big Data, and cloud services. Huawei switches already help customers achieve success in industries such as finance, Internet, retail, education. CloudEngine S5736-S Series Switches are next generation standard all-optical GE switches, with 48 downlink optical ports and four 10 GE uplink ports. This document describes the configuration of Ethernet services, including configuring link aggregation. The Huawei Fibre Switch doesn't just move data—it defies physics. In a world where every millisecond counts, this hardware is the unsung architect behind everything from lag-free 4K streaming to real-time stock trades. For businesses needing to switch to networks that won't buckle under. Huawei S Series Switches fully accommodate metro core, aggregation, edge aggregation, and access networking requirements, and are capable of building an integrated Metropolitan Area Network (MAN) Interconnection Solution.
