

# Huijue om4 bundled tail fiber

## Overview

This is a bundled cable (4-core), multimode (OM4), with MU-MU connectors. Please refer. The OM4 fiber type was standardized in 2009, and compared to OM3 fiber, it has a higher modal bandwidth of 4700 MHz/km, while OM3 has a modal bandwidth of 2000 MHz/km. This means that OM4 can send more data than OM3 over the same distance. Order now! The 12 Core Fiber Optic Pigtaileds are designed for high-speed data transmission in various applications, including telecommunications, data centers, and local area networks (LAN). 100% end-face, 3D interferometer, IL&RL tested. Leviton reserves the right to modify details without notice in light of subsequent standard/specification. High-Speed Computing switch fabrics Panduit® Laser-Optimized OM4 fibers extend the application of multimode fiber to support transmission at 10 Gb/s (at extended reach) and future speeds such as 40 and 100 Gb/s. When using low cost 850 nm Vertical Cavity Surface Emitting Laser (VCSEL) transceivers.
