

Installation process of distribution box lintel

Overview

Steel Lintels should be installed with a minimum end bearing of 150mm, bedded on mortar and levelled along its length and across its width. The masonry above the lintel should be built in accordance with BS EN 1996-2:2006. Raise the inner and outer leaves simultaneously to avoid excessive. sharper than those of mild steel lintels ! Use of g oves is recommended to handle the lintels ! The weight of some lintels may require the use of a crane; rotect fabric strops from the sharp edges ! The lintels may contain CFC-free polystyrene or Rock efer to our technical dept. or an engin rd. Leviat manufactures a range of Ancon Lintels in stainless steel. The Housing and Unilintel ranges are designed to suit the light to medium duty loading conditions found in the majority of residential and commercial buildings. Set Lintel on block with 8" of bearing each end, minimum 4" - see GSN #5. Apply bed joint on front and back of block. In this comprehensive guide, we'll explore the ins and outs of installing lintels.
