

International Standard Drop Cable Model

Overview

IEC TR 62901:2016 (E) which is a Technical Report, defines the term "drop cable", describes the application spaces and the performance requirements as a consequence of the different applications. Cable design options which result from specific applications which are not yet described in the. Corning SST-Drop™ indoor/outdoor dielectric cables provide the simple installation offered by standard SST-Drop cables designed for rugged outdoor environments and compact drop cables designed for challenging indoor bend environments. The design features a gel-free, fully waterblocked. FTTH Drop Cable is a last-mile fiber optic cable designed to connect the optical distribution network (ODN) to end users in Fiber to the Home (FTTH) systems. It is engineered for high-speed broadband access, low attenuation transmission, and flexible indoor-outdoor deployment, making it a core. High-quality SC singlemode I-V (ZN)H FTTH distribution cable (one side equipped with connectors, open side comes with pulling aid and bend-optimized) for universal indoor and outdoor application, including installation between buildings in ducts and inside buildings up to riser ducts.
