

Ireland 10W Adjustable Attenuator

Overview

The Bogen AT10A attenuator allows the output level of a network of 25V or 70V speakers to be controlled from a wall-mounted volume control, without affecting overall amplifier volume settings. The AT10A can handle speaker loads of up to 10W. The 10W mute for wireless communication engineers and electronic enthusiasts provides precise signal adjustment functions. Expert or hobbyist, this mute allows fine tunings of signal strength From testing to satellite communication, this 10W dampener is an essential instrument for various. Bird's 10 Watt Convection-Cooled RF Attenuators are the ideal choice when your application demands more than low-power attenuation—but without the complexity of high-power systems. Maintain integrity and control strength easily with this attenuator. 2 dB at a maximum input power of 10 W in the frequency range from DC to 500 MHz. power adjustment Reduction of RF power to protect sensitive devices such as.
