

Iron Tower Base Station Power Distribution Box

Overview

380VAC / 100A intelligent AC power distribution box, designed for new base stations, set up a field-level power distribution and equipment management platform, the oil machine, the state of utility power, lightning protection status to achieve remote monitoring, the base. 380VAC / 100A intelligent AC power distribution box, designed for new base stations, set up a field-level power distribution and equipment management platform, the oil machine, the state of utility power, lightning protection status to achieve remote monitoring, the base. HDT offers Power Distribution Units (PDUs) and Utility Distribution Boxes (UDBs) in various configurations. A Power Distribution Unit (PDU) allows two generators to be synchronized, and both are brought online to supply power to a common bus. The PDU is sized to handle the load that the two. BJ Electric according to the base station site application environment and the group company on the AC power distribution box, smart meter related norms, for the tower tailored: customized a set of AC power distribution intelligent solutions, to help improve its power distribution management level. Our metal electrical power distribution box is made of iron with painting which with complete size, including 6 ways, 10 ways, 14 ways, 20 ways, 22 ways, 36. In accordance with the relevant national construction specifications and related product technical specifications, this paper briefly describes the main content of power system configuration in iron tower room, aiming to provide some guidance and reference for the power system configuration in new. Walther Electric offers stock and custom-built power distribution systems, integrating multiple variations of receptacles, plugs and inlets that are identified as "Combination Outlets".
