

Ivory Coast OTN Router 200G

Overview

The solution adopts QT8600series equipment, with 2 100G CFP2 on the line side and 1 200G CFP2 on the client side each board, which can achieve 1.4T service capacity transmission with full configuration, and 8T service capacity transmission with 40CH DWDM MUX/DEMUX; the Huawei's E2E WDM/OTN intelligent optical transport solution is widely applicable to the backbone core layer, metro core layer, metro aggregation layer, and metro edge access layer along with Data Center Interconnect (DCI) scenarios. With over 20 years of innovations and practices, Huawei has. To achieve massive information interaction and meet the demand for ultra-high speed and ultra-bandwidth data center interconnection (DCI), QSFPTEK has launched the 200G transponder - a customized OTN transmission platform for DCI applications. It supports installation in a 19-inch or ETSI. Sharetop's OTN Transponder Platform developed is highly integrated with advanced technology. A single port can stably transmit 200G-rate services. It is mainly used in the core layer and convergence layer network of national optical network backbone lines, operator MAN, data center interconnection. RUT200 is a compact industrial cellular router that provides reliable, mission-critical connectivity in rigorous conditions common in industries like automation, transportation, and manufacturing. This model is equipped with 4G LTE, Wi-Fi, and two Ethernet ports, making it ideal for quickly setting. The customer has two equipment rooms separated by 200km and requires an optical transmission system to carry 100G/200G/400G services between them. Analyze service types (data, voice, video), transmission.
