

Junction Box Operation

Overview

A junction box is primarily used for housing connections between electrical cables. It does not control or distribute power in the same way as distribution or control boxes. Junction boxes protect electrical connections from exposure, damage. Junction Boxes (J-Box) are used with bolt-on sensors and direct support products to assemble all connections, wires and fittings. **WARNING: REMOVE POWER FROM THE UNIT BEFORE INSTALLING, REMOVING, OR MAKING ADJUSTMENTS. CAUTION: DO NOT INSTALL JUNCTION BOXES WHEN RAINING; MOISTURE WILL CAUSE.** Ensures emergency stop (E-Stop) functions are integrated into the system. These boxes are usually made out of metal or plastic, and they protect the wiring and prevent short circuits, which is why they are essential in.
