

# KVM Switcher 4-to-1 Input Output

## Overview

SC&T's HKM41E is a 4-in-1-out HDMI® switch that supports 1080p @60Hz 4:4:4. More than an HDMI® switch, HKM41E provides the multiview function for monitoring four audio and video inputs in real time. In addition, with the mouse roaming function, you can directly control the four videos in the multiview mode. SC&T specializes in serving global system integrators and has a high level of trust among its partners. The quality of all the products is carefully controlled, which reassures you when purchasing and employing the products. The poor circuit design used in an unidentified HDMI® KVM switch can result in a significant loss of product performance. This Multiviewer Mode HKM41E supports 5 screen-splitting modes, so you can decide which mode to use depending on your needs. Easy to set up, without the hassle of operation. Mouse-Roaming Constantly switching displays and remotely operating devices can be an annoyance. The HKM41E has a mouse roaming function that allows you to move your mouse between split screens and perform operations. Changeable Resolution You can change the output resolution between 720p and 1080p based on the s.
