

Laos s underground secret communication fiber optic cable

Overview

Laos has launched a new infrastructure project aimed at relocating internet, communication, and low-voltage electricity cables underground. The move is expected to improve public safety, reduce outages, and better organize the country's utility network. For years, Laos has faced challenges with its. Governments, militaries, businesses, and individuals see the nearly 600 fiber optic communication cables—also known as subsea communication cables, undersea cables, or submarine cables—as essential for daily life, with demand only growing due to AI and other technology advancements. 1 million mobile phone numbers across Laos have been issued, enabling internet. Ip the GOL prepare Lao National Broadband Plan for the period of 2021-2025. THE initial three-year phase of a huge IT project to build a telecoms network linking Cambodia with the region was completed when the fibre-optic cable to Laos was.
