

Latest Optical Cable Specifications

Overview

The Redline version is available in English only and provides you with a quick and easy way to compare all the changes between the official IEC Standard and its previous edition. IEC 60794-2-20:2024 is part of a family specification covering multi-fibre optical cables for indoor use. This document outlines the specifications for a single-mode optical fiber and cable designed for use around the 1310 nm zero-dispersion wavelength, suitable for both the 1310 nm and 1550 nm regions, and compatible with analogue and digital transmission. It details the fiber's geometrical, optical. All inclusive list of our product information sheets. These benefits include high bandwidth, high transmission speed, noise immunity, enhanced data security and extended reach.
