

# Libya High-Speed Optical Communication Module

## Overview

This 8,700-kilometre fibre-optic network, encompassing 24 fibre pairs and a capacity of 20 terabits per second per pair, is set to connect 11 countries across the Mediterranean, including Libya, by the end of 2025. Silphium, the first wholly owned submarine cable system targeted at the Libyan telecommunications market, is now operational. Libyan International Telecom Co. The project consists of four stages, with the current focus on the first two phases. The Medusa project, spearheaded by AFR-IX Telecom and supported by the European. Abstract—The design and analysis of a fiber-optic communication network for residential areas in the municipality of Sabratha, which is located between latitudes 32. 47006°S and longitudes 12. Optisystem, an advanced tool for. In strategic partnership with the General Electricity Company of Libya (GECOL), Global Technology Company is deploying a 14,000 km nationwide optical fiber backbone to power the next decade of digital transformation.
