

Libyan Overseas Warehouse Optical Receiver OSFP

Overview

The OSFP-800G-2xFR4L is designed to operate in switch and router applications supporting OSFP MSA compliant traffic for up to 6km links. 850 Gigabit signal is carried over 2xCWDM4 lanes. 25Gb/s electrical data to 8-channel. The Cisco ® OSFP 800G transceiver modules provide 800 Gigabit Ethernet (GE), 2x 400GE, 4x 200GE, and 8x 100GE connectivity options, complying with the Octal Small Form Factor Pluggable (OSFP) MSA for pluggable transceivers. The modules comply with the OSFP MSA configuration with integrated closed. ical interconnects for data communications applications. The explanation appears simple to understand. However, it shows a deeper meaning that extends beyond its first impression. The high-bandwidth module supports dual 400G Ethernet connections or a single 800G Ethernet connection over two duplex single-mode fiber cables via two standard LC duplex receptacle optical connectors up to 2 km reach.
