

Low-filtration distribution box fan

Overview

Box-type Fans use an enclosed cabinet structure to lower noise, stabilize airflow, and support optional filtration for cleaner ventilation. These units offer steady performance with low vibration, making them well-suited for workshops, offices, HVAC systems, and general building. ● Very low noise ● Minimal depth in enclosure ● Functional design ● Time-saving installation ● Weather proof and UV resistant

*Using fine filter mats type F5 increases the protection type to Ip55, but reduces the air volume. The self-adhesive sea of the mounting frame prevents dust and water from. While filter fans and roof-mounted fans rely on a process known as air exchange, which uses a forced airflow to dissipate the heat in the enclosure into the surroundings, an air/air heat exchanger consists of two closed circuits, meaning that no external air flows through the enclosure. In an. Our climate controlled boxes and enclosures feature built-in air conditioners, heaters and thermostats and are ideal for mounting electrical and electronic equipment both indoors and outdoors. Using available ambient cool air, Kooltronic fans provide an economical way to efficiently meet your cooling and air moving needs. Our enclosure fan and filter units are a practical, reliable solution that can facilitate the dissipation of hot air inside cabinets and electrical panels.
