

Machine for laying fiber optic cables in ducts

Overview

An optical fibre blowing machine is a dedicated instrument for cable laying into subterranean tubes. The device uses air pressure or the power of a motor to push the cable through the pipe with ease, thus insuring the cable is installed safely and smoothly without inflicting harm on. Our product portfolio consists of various equipment that is used in building fiber optic cable networks. This consists of Fiber Jet – Fiber Optic Cable Blowing Machine, Fib Rod – Fiber Glass Duct Rodder used for cable pulling, HDPE duct accessories like Push-Fit Couplers, Simplex Plugs, Manhole. Compatible with cables ranging from 1mm up to 24mm and duct sizes for all standard installations. Intuitive and friendly use interface and intelligent control panels for quick and efficient blowing of cables. Pneumatic Cable Blowing Machine is a pneumatic based optic fiber cable installing machine. Their design is optimized for maximum.
