

Making photovoltaic cable tray bends

Overview

The assembly guide below will help the cable tray installer make the bends and others without difficulty even if he had never installed wire mesh cable trays before. Guide for making bends, tees, crosses, risers and reducers from straight sections of wire basket. The bends, tees, crosses, risers and reducers of wire mesh cable tray can be easily and quickly made live at the project by using a bolt cutter. Since the jaws of the bolt cutter drag a layer of zinc across the cut end and forms a protective layer. Our patented QuikLok tray profile connects straight lengths of tray at record speed. No connection component using a screwdriver. Only in this long way, we are able to develop all the necessary knowledge and experience to apply this into the market as a quality service with hard cable containment. The innovative Magic connector system for GRM and G-GRM mesh cable tray type or ceiling using different mounting methods. The ET 'EzyTray', ET3 and ET5 are designed to work how you want to work around your project. Unlike the CT range of tray, the ET range does not come with pre-made fittings, rather, it uses accessories that allow you to bend, rise, or join straight lengths together either in series or to fabricate a. As a professional manufacturer of photovoltaic supports and cable trays, CANHOPE has accumulated years of experience in research, production, fabrication, and installation. To meet changing market needs, we have independently developed the self-locking reinforced photovoltaic cable tray.
