

Maximum Support Spacing for Cable Trays

Overview

National Electrical Code (NEC) Article 392 (USA): This code provides comprehensive guidelines for cable trays, including requirements for cable types, fill capacity, support methods, and spacing. NEC Article 392 outlines the key rules for installing and maintaining industrial cable tray systems. These systems, made from metal or plastic, are open structures designed to support electrical conductors, ensuring proper organization and safety. Here's what you need to know: Cable Types: Only use. us-trations without notice. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. , is a welded wire-mesh cable management system made of high-strength steel wire. Horizontal Runs: Cables should be secured at their start, end, and turns, and every 3 to 5 meters along straight horizontal sections.
