

New type of cable tray sealing

Overview

New fireproof plugging materials have made many improvements on the basis of traditional materials, such as modular cable/pipe sealing systems, which have significant advantages in fireproof performance, environmental protection, construction convenience and comprehensive cost. New fireproof plugging materials have made many improvements on the basis of traditional materials, such as modular cable/pipe sealing systems, which have significant advantages in fireproof performance, environmental protection, construction convenience and comprehensive cost. SLIPSIL Sealing Plugs are an ideal solution for the fire-safe, gas and / or watertight sealing of penetrations carrying single or multiple pipes. A better alternative to link-type seals, the SLIPSIL Plugs utilize a proprietary self-compression design, and have no bolts, nuts or metallic parts that. Seal cable penetrations with our modular firestop solutions, designed to create water-, smoke- and gas-tight barriers in energy and industry projects both onshore and offshore. Because of its closed design, this type of tray should be used in applications where there is minimal risk of heat generation and buildup. Our solutions are easy to use and help you ensure safety, efficiency and operational reliability through all phases of your construction project. These manufacturers are increasingly turning to materials like stainless steel and fiberglass.
